This text describes the functions that the BIOS controls and how these relate to the hardware in a PC. It covers the CMOS and chipset set-up options found in most common modern BIOSs. It also features tables listing error codes needed to troubleshoot problems caused by the BIOS.

25th ANNIVERSARY EDITION ¶ An epic novel of the violence and depravity that attended America's westward expansion, Blood Meridian brilliantly subverts the conventions of the Western novel and the mythology of the Wild West¶from the bestselling, Pulitzer Prize¶winning author of The Road Based on historical events that took place on the Texas-Mexico border in the 1850s, it traces the fortunes of the Kid, a fourteen-year-old Tennessean who stumbles into the nightmarish world where Indians are being murdered and the market for their scalps is thriving.

This book is essential for audio power amplifier designers and engineers for one simple reason...it enables you as a professional to develop reliable, high-performance circuits. The Author Douglas Self covers the major issues of distortion and linearity, power supplies, overload, DC-protection and reactive loading. He also tackles unusual forms of compensation and distortion produced by capacitors and fuses. This completely updated fifth edition includes four NEW chapters including one on The XD Principle, invented by the author, and used by Cambridge Audio. Crosstalk, power amplifier input systems, and microcontrollers in amplifiers are also now discussed in this fifth edition, making this book a must-have for audio power amplifier professionals and audiophiles.

The Caspian Basin region has boomed since the late 1990s due to new oil discoveries, new pipelines that have diversified countries' transport options and world oil prices that have risen from below \$10 in 1998 to \$70 in 2006. This book analyzes the experience of the Caspian countries during the oil boom. It is founded on empirical studies, using either macroeconomic tools or an analysis of public budgets, or microeconomic analysis of household survey data or fieldwork in oil-producing regions. Moving from aggregated to disaggregated analysis and, in-keeping with its emphasis on rigorous empirical analysis to the greatest extent possible, several chapters are written by specialists on the Caspian region. Whilst there is an emphasis on the economic consequences of the oil boom, the interdisciplinary aspects of the phenomenon are also recognized. Overall, the analysis is firmly rooted in the region, yet the empirical studies also provide a basis for drawing broader lessons about the effects of an oil boom.

Manual focusing on documenting the occupational therapy process. Each skill is broken down into small steps and taught individually. Includes a template for writing problems, goals, and each section of the SOAP note. Also includes practice worksheets and detachable checklist and summary.

How to make customers feel good about doing what you want Learn how companies make us feel good about doing what theywant. Approaching persuasive design from the dark side, this bookmelds psychology, marketing, and design concepts to show whywe¶re susceptible to certain persuasive techniques. Packedwith examples from every nook and cranny of the web, it provideseasily digestible and applicable patterns for putting these designtechniques to work. Organized by the seven deadly sins, itincludes: Pride ¶ use social proof to position your product in linewith your visitors¶ values Sloth ¶ build a path of least resistance that leads userswhere you want them to go Gluttony ¶ escalate customers¶ commitment and use loss aversion to keep them there Anger ¶ understand the power of metaphysical argumentsand anonymity Envy ¶ create a culture of status around your product andfeed aspirational desires Lust ¶ turn desire into commitment by using emotion todefeat rational behavior Greed ¶ keep customers engaged by reinforcing thebehaviors you desire Now you too can leverage human fallibility to create powerfulpersuasive interfaces that people will love to use ¶ but willyou use your new knowledge for good or evil?
