The Memorabilia is a defense of Socrates, offering edifying examples of Socrates' conversations and activities. Xenophon argues that Socrates was innocent of the formal charges against him: failure to recognize the gods of Athens, and corruption of youth. He demonstrates how Socrates benefited Athenians and their society.

"Information Gathering in Classical Greece opens with chapters on tactical, strategic, and covert agents. Methods of communication are explored, from fire-signals to dead-letter drops. Frank Russell categorizes and defines the collectors and sources of information according to their era, methods, and spheres of operation, and he also provides evidence from ancient authors on interrogation and the handling and weighing of information. Counterintelligence is also explored, together with disinformation through "leaks" and agents. The author concludes this fascinating study with observations on the role that intelligence-gathering has in the kind of democratic society for which Greece has always been famous"--Publisher description.

The second edition of the *Impact Evaluation in Practice* handbook is a comprehensive and accessible introduction to impact evaluation for policy makers and development practitioners. First published in 2011, it has been used widely across the development and academic communities. The book incorporates real-world examples to present practical guidelines for designing and implementing impact evaluations. Readers will gain an understanding of impact evaluations and the best ways to use them to design evidence-based policies and programs. The updated version covers the newest techniques for evaluating programs and includes state-of-the-art implementation advice, as well as an expanded set of examples and case studies that draw on recent development challenges. It also includes new material on research ethics and partnerships to conduct impact evaluation. The handbook is divided into four sections: Part One discusses what to evaluate and why; Part Two presents the main impact evaluation methods; Part Three addresses how to manage impact evaluations; Part Four reviews impact evaluation sampling and data collection. Case studies illustrate different applications of impact evaluations. The book links to complementary instructional material available online, including an applied case as well as questions and answers. The updated second edition will be a valuable resource for the international development community, universities, and policy makers looking to build better evidence around what works in development.

Winner of the SAGE/ILTA Book Award 2016 *Re-examining Language Testing* explores ideas that form the foundations of language testing and assessment. The discussion is framed within the philosophical and social beliefs that have forged the practices endemic in language education and policy today. From historical and cultural perspectives, Glenn Fulcher considers the evolution of language assessment, and contrasting claims made about the nature of language and human communication, how we acquire knowledge of language abilities, and the ethics of test use. The book investigates why societies use tests, and the values that have driven changes in practice over time. The discussion is presented within an argument that an Enlightenment inspired view of human nature and advancement is most suited to a progressive, tolerant, and principled theory of language testing and validation. Covering key topics such as measurement, validity, accountability and values, *Re-examining Language Testing* provides a unique and innovative analysis of the ideas and social forces that shape the practice of language testing. It is an essential read for advanced undergraduate and postgraduate students of Applied Linguistics and Education. Professionals working in language testing and language teachers will also find this book invaluable.

Oscar Wilde's imagination was haunted by ancient Greece; this book traces its presence in his life and works.

How did ancient Greek men and women deal with the uncertainty and risk of everyday life? What did

they fear most, and how did they manage their anxieties? Esther Eidinow sets side-by-side two collections of material usually studied in isolation: binding curse tablets from across the ancient world, and the collection of published private questions from the oracle at Dodona in north-west Greece. Eidinow uses these texts to explore perceptions of risk and uncertainty in ancient society, challenging previous explanations. In these records we hear voices that are rarely, if ever, heard in literary texts and history books. The questions and curses in these tablets comprise fervent, sometimes ferocious appeals to the gods. The stories they tell offer tantalizing glimpses of everyday life, carrying the reader through the teeming ancient city - both its physical setting and its social dynamics. Among these tablets we find prostitutes and publicans, doctors and soldiers, netmakers and silver-workers, actors and seamstresses. Anxious litigants ask the gods to silence their opponents. Men inquire about the paternity of their children. Women beg the gods to help them keep their men. Business rivals try to corner the market. Slaves plead to escape their masters. This material takes us beyond the headlines of ancient history, offering new insights into institutions, activities, and relationships. Above all, individually and together, these texts help us to understand some of the ways in which ancient Greek men and women understood the world. In turn, the beliefs and activities of an ancient culture may shed light on modern attitudes to risk.

Each test-preparation handbook is designed to help students achieve high scores on a particular exam and includes thorough reviews of the subject matter, practice questions with detailed answer explanations and helpful test-taking skills.
