Rose is a princess, a Cinder, and half-human. She is the last one born of her kind, and on her twenty-first birthday, she must enter the woods and travel to find her Prince, as her sisters did before her. ". . . And we will all dance at the Grand Ball," her sisters would always say. But the Human servants are keeping a secret that could prevent the Cinders from reaching their Happily Ever After....Hidden in Rose's dreams and vision are the answers of the past between Cinders and Humans, and she is quickly running out of time trying to solve their hidden messages. She knows the answer lies in her first clue--identifying an animal she has never seen before--that persistent vision of a furry white animal, holding a gold metal object and exclaiming, "Oh dear! Oh dear! I shall be too late!"

Information appliances and other interactive products "beyond the desktop" present user interface design challenges that are only beginning to be understood. In this one-of-a-kind book, interaction designers examine the issues they confronted in their projects: Microsoft Windows CE, a vehicle navigation system, interactive children's toys, and more. You'll enjoy reading their engaging and sometimes surprising stories, but more importantly you'll gain insights that will benefit your own design and development work. * Begins with an interview in which design expert Don Norman details his vision of "making technology invisible." * Includes an eight-page, full-color insert containing screen shots, product diagrams, and other illustrations. * Presents inside accounts of information appliance success stories including: * An interview with Rob Haitani, lead interaction designer of the original PalmPilot * The design and evaluation methodologies behind Nokia's mobile phones * The high-level information appliance design considerations emphasized by Sun Microsystems * Essential reading for interaction designers, human factors engineers, usability specialists, software engineers and project managers working in all of these areas.
