Beskriver svæveflyvning og navnlig svæveflytyper gennem tiderne.

Redefining Airmanship offers the first concrete model of the abstract ideal of "airmanship," and gives the reader step-by-step guidance for self-appraisal and improvement in the areas of flight proficiency, teamwork, and good judgment in crisis situations. The author, Major Tony Kern, draws on his extensive flight and crew-training experience in the U.S. Air Force, but his model is invaluable for all pilots, whether military, recreational, or commercial. "Kern's work is a breakthrough, and a benchmark." --John J. Nance, author of Blind Trust

81 Lessons From The Sky contains eighty-one easy-to-read, true stories from actual pilots, including what they learnt from their accidents and near misses. Eighty-one stories from around the globe, from the General Aviation community on their own near misses and their learnings.

Covers all sources of energy for soaring but it also deals with weather analysis, flight preparation, mental aspects, safety matters, technical issues and competitive flying. It is a first class training aid to guide pilots from local soaring to advanced cross-country flying and beyond.

This unique book by Prof. Fred Thomas of the Technical University of Braunschweig grew out of the author's work with the Braunschweig Akaflieg (University-affiliated Academic Flying Group). In its original German, it served as a textbook and valuable reference for students in the Akafliegs. This English edition has been expanded and updated to include many sailplanes and technical developments appearing since the latest German edition. The book emphasizes physical relationships rather than mathematical detail, making it suitable for beginning pilots and engineers alike. Discusses the design of high-performance sailplanes: Aerodynamics, Flight Mechanics, Certification Regulations, Cross-Country Theory, and Design Optimization. Includes a reference section with basic design data for over 150 sailplanes.
